Attached are the remaining eleven (11) Phase I Environmental Site Assessment (ESA-I) reports, requested September 7, 2004:

- 1) Parcel S71-047, located at 67<sup>th</sup> & Navigation
- 2) Parcel S71-048, located at 6600 Navigation
- 3) Parcel S71-049, located at 6600 Navigation
- 4) Parcel S71-051, located at Navigation & Terminal
- 5) Parcel S83-034, located at Conley & Mainer
- 6) Parcel S83-058, located at Garland & Vandeman
- 7) Parcel S97-032, located at 4400 Clark
- 8) Parcel SY4-036, located at Cullen & E. Orem
- 9) Parcel SY4-044, located at 4500 Swanson
- 10) Parcel SY5-010, located at Munn Street
- 11) Parcel SY5-012, located at Munn Street

2004 NOV - 5 PM 12: 56  
REAL ESTATE DIVISION  
RECEIVED

These ESA-Is revealed no Recognized Environmental Conditions (RECs), as defined by ASTM E 1527-00, in connection with the subject properties, which warrant further environmental assessment on any of these properties. However, even though Tolunay-Wong Engineers, Inc. (TWEI) found no RECs at the property located at 4500 block of Swanson Boulevard (Parcel SY4-044), they recommend that in the event that the City of Houston should decide to retain, instead of sell, and then develop the property, an ESA II should be conducted to verify absence of any RECs at the property. Their recommendation is based on the long history of commercial and industrial activity adjacent to and near the property. TWEI believes if the property is sold, any additional investigation should be conducted by the buyer. Attached are three to five (3 to 5) copies of each ESA I report.

If you have any questions, please do not hesitate to call Maher Tanbouz, P.E., at (713) 837-7060, or M. C. Samani, P.E. at (713) 837-0514.

Report No: 1010-06

Dear Mr. Tanbouz:

Contained within this transmittal are the results of the Phase I Environmental Site Assessment performed for the above referenced project. This report presents data and recommendations for the above site. This study was authorized as per our communication for our professional services.

We thank you for allowing us to work with you on this project and look forward to opportunities to work with you and the City of Houston Department of Public Works in the future.

Sincerely yours,

  
Tony L. Council, P. E.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

PARCEL S71-051  
NAVIGATION AND TERMINAL

for the

CITY OF HOUSTON

Department of Public Works and Engineering

## 1. SUMMARY

TLC Engineering, Inc. has completed a Phase I Environmental Site Assessment (ESA I) on Navigation and Terminal - PARCEL S71-051 for the City of Houston. A detailed site location is listed in Section 3 of this report.

A total of sixty-three (63) sites were revealed at twenty-five (25) locations in a review of environmental records. The following sites required further review:

- (1) Twelve (12) Leaking Underground Storage Tanks (LUSTs) one (1)- 0.02 NW, one (1)- 0.27 NW, one (1)- 0.33 NW, two (2)- 0.34 NW, two (2)- 0.35 NW, one (1)- 0.38 NW, one (1)- 0.39 NW, one (1)- 0.40 NW, one (1)- 0.42 NW, and one (1)- 0.44 NW.
- (2) Three (3) Texas Spills List (TXSPILL), two (2) 0.02 NW, and (1) 0.13 NW.
- (3) Four (4) Emergency Response Notification System (ERNS), two (2) 0.02 miles SW of the site, and two (2) 0.02 miles NW of the site.

Two (2) of the three (3) TXSPILL listings were located at Reed Tool Company .03 miles SW of the site. Both sites were listed as minor oils pills that occurred in July and August of 1998. The cleanup status on the July spill, which affected land and water, is listed as complete and the August spill that affected land has not submitted a letter to the TCEQ. The third spill occurred in June of 1998 in a storm sewer at 6418 Esperson. This spill affected land and water and the cleanup status is listed as complete.

Reed Tool Company is also the location of four (4) ERNS listed in environmental records review. Records reveal that within a forty-five (45) day period in 1998, four (4) releases of hazardous substances were reported. Reed Tool Company is also the site of a current groundwater remediation project. Although past and current use of the properties described herein have indicated areas of recognized environmental concerns, these areas of concern do not impact subject site.

It is the opinion of TLC Engineering, Inc. that no potential for environmental contamination exists on the property. Please note that this summary does not fully relate our findings and opinions. Those findings and opinions are only related through our full report.

## 2. INTRODUCTION

### 2.1 Purpose

The purpose of this study is to identify, to the extent feasible, recognized environmental conditions that may exist at this location. Recognized environmental conditions, as defined by the ASTM Standard, in this case means

the presence or likely presence of any hazardous substances or petroleum products on the site from conditions that a past release occurred of any hazardous substances or petroleum products into structures on the site or into the ground, groundwater, or surface water of the site. This does not include conditions that generally do not present a material risk of harm to public health or the environment.

## **2.2 Detailed Scope of Services**

The Phase I ESA on the site described herein conforms to the ASTM Standard Practice E 1527-00 with the amendments as per City of Houston Department of Public Works and Engineering ECRE Standard Practice (3/23/98), (Appendix C).

- (1) Environmental regulatory agency summary records were obtained for sites near the project. Following initial review, additional information was obtained through file review, field observations, and interviews.
- (2) Available historical maps, aerial photos, and directories were obtained and reviewed to determine if current or prior land owner/occupants may have engaged in activities on adjacent properties which may have been an environmental concern.
- (3) This report was prepared summarizing our findings, conclusions, and recommendations.

## **2.3 Significant Assumptions**

This ESA Phase I is intended for use by the City of Houston to assess the environmental conditions of the herein described real estate. This ESA Phase I is intended primarily as an approach to conducting an inquiry designed to identify recognized environmental conditions in connection with the site.

Additionally, it should not be concluded or assumed that an inquiry did not identify recognized environmental conditions in connection with a property. Environmental site assessments must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent environmental site assessments should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors. This environmental site assessment meets and/or exceeds E 1527-00 is presumed to be valid for a period of one hundred eighty (180) days.

## **2.4 Limitations and Exceptions**

This report is an instrument of service of TLC Engineering, Inc. The report was prepared for and is intended for the exclusive use of the City of Houston. Any other party without the express written permission of TLC Engineering, Inc. may not rely upon the report's contents.

The report's findings are based upon conditions that existed on the date of TLC Engineering, Inc.'s site visit and available records and should not be relied upon

to precisely represent conditions at any other time. Certain indicators of the presence of hazardous materials may have been latent at the time of site reconnaissance and may subsequently have become observable.

TLC Engineering, Inc. has based the conclusions included in the report on its observation of existing conditions, its interpretation of site history, and its interpretation of the usage it was able to access. All conclusions are qualified by the fact that no borings were made and no soil, sediment, or groundwater sampling or chemical testing was conducted. Conclusions about site conditions under no circumstances comprise a warranty that conditions in all areas within the site and study area (and below existing grade) are of the same quality that TLC Engineering, Inc. has inferred from observable site conditions and readily available site history.

TLC Engineering, Inc. reserves the right to alter our conclusions and recommendations based on our review of any information obtained after the date of this report. Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by environmental consultants practicing in this or similar localities. No warranty, express or implied, is made as to the professional information included in this report.

#### **2.5 Special Terms and Conditions**

- (1) The following tasks were waived by the City of Houston:
  - a. Chain of Title Search
  - b. Environmental Liens Research
  - c. Federal Emergency Management Association (FEMA) Flood Insurance Map Review
- (2) Sanborn Fire Insurance Maps were non-existent for this section of the city.

#### **2.6 User Reliance**

The City of Houston has provided TLC Engineering, Inc. with site location maps, flood zone map, Harris County Appraisal District Real Property Account information, and interoffice correspondence related to said properties.

The City of Houston has not reported to TLC Engineering, Inc. any environmental liens encumbering the site or any specialized knowledge or experience that would provide important information about previous ownership or uses of the property that may be material to identifying recognized environmental conditions.

TLC Engineering, Inc.'s findings and opinions must be considered probabilities based on professional judgment applied to the limited data TLC Engineering, Inc. was able to gather during the course of the site assessment.

### **3 SITE DESCRIPTION**

This site is located in the Central Park Addition, (Plate 1), 95° 17.663' N latitude, 29° 44.559' W longitude, in Houston, Harris County, and is located near the intersection of

Terminal and Navigation (Plate 1). The site encompass approximately 12,278 square feet, tract of land,

### **3.1 Locations and Legal Descriptions**

#### **Location**

Navigation and Terminal  
Harris County Key Map Grid 494T

#### **Legal Description**

Field notes covering a parcel or tract of land, containing 12,278 square feet,, being the residue of 1, 2, 3, 4, and 8, Block 126, Central Park Addition, as per map or plat of said addition recorded in Volume 5, Pages 23 and 24 of the Map Records of Harris County, Texas, in the S. M. Williams Survey, Abstract 87, in Houston, Harris County, Texas and being more particularly described by metes and bounds as follows:

Beginning at a point, in the intersection of the north line of Navigation Boulevard with the Westerly line of Block 126, Central Park Addition;

Thence N 31° 46' E, along the westerly line of said Block 126, a distance of 248.81 feet to a ¾ inch iron rod marking the most northerly corner of said Block 126;

Thence South along the east line of said Block 126, and the West line of Terminal Street a distance of 92.65 feet to a ¾ inch iron rod;

Thence S 20° 49' W, along the West line of Terminal Street, a distance of 142.68 feet to a point;

### **3.2 Site and Vicinity Characteristics**

The site is located in a mixed residential, industrial, and commercial area southeast of the central business district of downtown Houston. Terminal runs parallel to a major area rail line. The Houston Ship Channel and Buffalo Bayou play major factors in the areas businesses and industries.

### **3.3 Descriptions of Structures**

There are no structures on the property.

### **3.4 Current Use of Site**

Subject property is currently vacant.

### **3.5 Current Use of Adjoining Property**

Subject site adjoins the southern boundary of the area rail tracks that run parallel with Terminal Drive.

#### 4 USER-PROVIDED INFORMATION

##### 4.1 Title Records

Research and investigation not within the Scope of Work.

##### 4.2 Environmental Liens

No knowledge of environmental liens regarding this site was transmitted to TLC Engineering, Inc. by the City of Houston.

##### 4.3 Special Knowledge

No specialized knowledge or experience regarding this site was transmitted to TLC Engineering, Inc. by the City of Houston.

##### 4.4 Valuation Reduction for Environmental Issues

Research and investigation not within the Scope of Work.

##### 4.5 Owner, Property Manager and Occupant Information

Current property owner is the City of Houston.

##### 4.6 Reason for Performing Phase I

This Phase I is being performed to identify, recognized environmental conditions that may exist at this location.

#### 5. RECORDS REVIEW

TLC Engineering, Inc. reviewed federal and state agency databases obtained from TelALL Corporation, HAZMAT, and TEXAS COMMISSION ON ENVIRONMENTAL QUALITY - TCEQ (formerly Texas Natural Resource Conservation Commission - TNRCC) for nearby regulated sites to determine their status and to identify specific addresses and site names that would aid in conducting our field reconnaissance. The general boundary of the search area includes the site and extends about five hundred feet (500) from the project area for most sites, and one (1) mile for federal and state superfund sites, and federal hazardous waste sites. The environmental sites are shown on the Environment Site Summary Map on Plate 2 of this report. A copy of the environmental records reports obtained from TelALL Corporation, Appendix B is included in the report.

A complete list of all government records searched is included in the TelALL report in the Appendix B.

## 5.2 Physical Setting Sources

### a. Topography

A review of the U.S.G.S. 1982 Park Place 7.5 Minute topographic quadrangle map shows that the elevation of the site is well above grade at 32 feet above mean sea level (MSL). (Plate 3).

### Geology and Soil Characteristics

A review of the Bureau of Economic Geology 1982 Quadrangle Atlas of Texas, Houston Sheet indicates that the uppermost geologic formation underlying the study area is a Lissie Formation dating back to the Pleistocene era. This formation dips gently towards the gulf. The formation also underlies non-related soils on the coastal area that consist primarily of clays silts and sands which were deposited, in fluvial (river-derived) environments.

Information concerning the area soils was obtained from the U.S. Soil Conservation Service 1976 Soil Survey of Harris County, Texas, Sheet #45. The property site lies within the Clodine Loam, a soil that occurs in nearly level terrains, is poorly drained, and exhibits moderate permeability.

#### **Groundwater Characteristics**

Groundwater occurs in two main aquifers, the Chicot and the Evangeline Aquifers. The Chicot is the shallowest aquifer that produces sufficient quantities of water for domestic, commercial, and light industrial purposes in the Houston area. Both aquifers dip gently toward the coast. Shallower groundwater is also encountered in this area of Houston. Typically, the shallow water-bearing zones are first encountered at depths of 10 feet or more below ground surface.

#### **Wetlands**

Not within the scope of the project.

### **5.3 Historical Use Information on the Site**

#### **San Born Fire Insurance Maps**

San Born Fire Insurance Map coverage was not done in this area.

#### **Aerial Photos**

Seven (7) sets of aerial photos were located for the subject property and can be found in Appendix D. Photos from 1992,1986,1979,1969,1953 and 1944 were available.

- 1944 This photograph shows the Central Park Addition well developed. Neighborhood street are defined, Navigation and Terminal are easily recognizable. The Buffalo Bayou is clearly visible in the northern area of the photo. The railway that runs parallel to Terminal is visible. The area and industry is supported by the nearby Houston Ship Channel.
- 1953 Like the 1944 photo, this area remains the same.
- 1969 This photo shows a densely populated area surrounded by commercial and industrial activity associated with the Houston Ship Channel.
- 1979 This photo shows widening of the Buffalo Bayou, widening of Navigation and expansion of the rail line that runs parallel to Terminal.
- 1986 There is little change from the 1979 photo.
- 1995 Continued industrial expansion is noted. Navigation and Terminal intersection is clearly visible. Navigation is widened. Photo remains largely unchanged from the 1986 photo.
- 2002 Navigation overpass construction at the Terminal intersection clearly visible. The Buffalo Bayou remains integral in the industrial activity in the area. The residential development remains unchanged.

#### **City Directory Search**

City Directories were searched for the years indicated and the following information was found:

**1946-47**

Navigation	6416	Steel & Machine Tool Sales Co
Navigation	6505	Construction & Maintenance Co

Navigation	6416	Champion Industrial Sales Co
Navigation	6501	Reed Tool Co
Terminal	1121	Vacant
Terminal	1710	Residential Listing

**6. SITE RECONNAISSANCE**

**6.1 Methodology and Limiting Conditions**

A site reconnaissance was performed on September 17 and September 19, by automobile and foot. Purposes of the site reconnaissance were to observe the site and adjacent sites for characteristics, spills, corrective actions, and other potential environmental concerns, and to document present land uses.

The objective of our site reconnaissance was to obtain information indicating the likely hood of identifying recognized environmental conditions in connection with the site. On our visit we visually and physically observed the property described within this report.

**6.2 General Site Setting**

Approaching the site driving west on Navigation, the area is identified as a mixed residential, commercial and industrial vicinity. The neighborhood is located in close proximity to the Houston Ship Channel and the Buffalo Bayou. Navigation, Wayside, and Harrisburg are major thoroughfares in the area. Reed Tool Company, a major area of concern listed in the regulatory data, was observed.

**6.3 Exterior Observations**

Not applicable.

Much of the area industry utilizes the railway that runs parallel to Terminal.

It was evident that widening of Navigation has left several residual pieces of property in the area. Rail activity was also observed during the site visit.

**6.4 Interior Observations**  
Not applicable.

## **7. INTERVIEWS**

### **7.1 Interviews with Owner(s)**

Not Applicable

### **7.2 Interviews with Site Manager**

Not Applicable

### **7.3 Interviews with Occupants**

Not Applicable

### **7.4 Interviews with Local Government Officials**

The Houston Fire Department Hazardous Materials (HAZMAT) division was contacted to provide response information for the project site and surrounding areas for this report. The list of Response Team incidents from January 1 1994 through October 19, 2004 is included in Appendix C.

The data provided did not list HAZMAT responses that adversely impact project site.

### **7.5 Interviews with Others**

There were no industrial/commercial land use on adjoining property but there is heavy industrial/commercial land use in close proximity to project site. Reed Tool Company was contacted to provide information regarding environmental listings found on the regulatory data. I spoke with Erica in the Environmental Department. Of greatest concern was the groundwater remediation project that is being carried out. She substantiated the fact that historically, land use in the area near the project site has been used for industrial use and that hazardous chemicals had been stored on property near the facility. She has not seen any stained soil or any fill dirt being transported to the area. Reed Tool currently has a Texas Pollutant Discharge Elimination System (TPDES) permit authorizes a wastewater discharge. There is also a groundwater remediation project in progress at this time. Reed Tool has removed all Underground Storage Tanks (UST) and replaced them with Above Ground Storage Tanks (AST). Prior to 1994 Reed Tool also had a private-well on property.

## **8. FINDINGS**

Recognized environmental conditions are defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, ground water, or surface water of the property".

A total of sixty-three (63) sites at twenty-five (25) locations were reported. One (1) CORRACTs, four (4) ERNS, one (1) NFRAP, three (3) RCRA-TSDs, four (4), RCRA-Gs, twelve (12) LUSTs, three (3) TXSPILLS, thirty-one (31) TXUSTs, and three (3) TXVCPs.

Past and current use of the properties described herein has caused areas of recognized environmental concerns.

## **9. OPINIONS**

Based on the information obtained in this study, TLC Engineering, Inc. is of the opinion that there is no potential for soil and/or groundwater contamination to impact the project.

## **10. CONCLUSIONS**

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-00 and City of Houston Department of Public Works and Engineering ECRE Standard Practice (3/23/98) on subject property described within this report. Any exceptions to, or deletions from this practice are described in Section 2 and 11 of this report. This assessment has revealed evidence of recognized environmental conditions in connection with the site.

## **11. DEVIATIONS**

Other than a very slight deviation in search distance, to comply with City of Houston Department of Public Works and Engineering ECRE Standard Practice (3/23/98), (See Appendix E), which is allowed for in the ASTM Standard Practice E 1527-00, this study did not deviate from the ASTM Practice. Search radii for environmental database information were five hundred (500) feet instead of directly adjacent or one half (.5) mile for all records except NPL, CERCLIS, and State Superfund, which was one (1) mile. Chain of Title records were not included and were not required.

## **12. ADDITIONAL SERVICES**

No additional services were contracted between the City of Houston and TLC Engineering, Inc.

## **13. REFERENCES**

## Preface

This document of environmental concerns near Navigation and Terminal, Harris County, TX reports findings of the TelALL data search, prepared on the request of TLC Engineering.

TelALL Corporation (TelALL) has designed this document to comply with the ASTM standard E 1527 - 00 sec.7.1.3 (Accuracy and Completeness) and has used all available resources but makes no claim to the entirety or accuracy of the cited government records. Our databases are updated at least every

90 days or as soon as possible after publication by the referenced governmental agencies (ASTM 1527 - 00 sec. 7.1.7). The following fields of governmental databases may not represent all known, unknown or potential sources of contamination to the referenced site. Many different variables effect the outcome of the following document. TelALL maintains extremely high standards, and stringent procedures that are used to search the referenced data. However, TelALL reserves the right at any time to amend any information related to this report.

If there is a need for further information regarding this report, or for any customer support please call TelALL at 800 583-0004 for assistance.

This report is divided into the following components:

- MAP** Identified geocodeable findings relative to this data search.
- SUMMARY 1** Sorting of the identified sites by distance from the subject site.
- FINAL** A description of each database and a detailed explanation of findings.

## **NPL**

### National Priority List

NPL is a priority subset of the CERCLIS list. (See CERCLIS, below) The Cerclis list was created by the Comprehensive Environmental Response, Compensation and Liability Acts (CERCLA) need to track contaminated sites. CERCLA was enacted on 12/11/80, and

amended by the Superfund Amendments and Reauthorization Act of 1986. These acts established broad authority for the government to respond to problems posed by the release, or threat of release of hazardous substances, pollutants, or contaminants. CERCLA

also imposed liability on those responsible for releases and provided the authority for the government to undertake enforcement and abatement action against responsible parties.

## **CERCLIS**

### Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS is the official repository for site and non-site specific Superfund data in support of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). It contains information on hazardous waste site assessment and remediation

from 1983 to the present. CERCLIS information is used to report official Superfund accomplishments to Congress and the public, assist EPA Regional and Headquarters managers in evaluating the status and progress of site cleanup actions, track Superfund

Comprehensive Accomplishments Plan (SCAP), and communicate planned activities and budgets.

**RCRA TSD****Resource Conservation and Recovery Information System - Treatment Storage or Disposal**

Resource Conservation and Recovery Information System (RCRIS) Under the Resource Conservation and Recovery Act (RCRA), generators, transporters, treaters, storers, and disposers of hazardous waste as defined by the federally recognized hazardous waste are required to provide information concerning their activities to state environmental agencies, who in turn provide the information to regional and national U.S. EPA offices. The RCRA TSD (Treatment Storage or Disposal) is a subset of the RCRIS list.

RCRA TSD tracks facilities that fall under the Treatment Storage or Disposal classification.

**ERNS**

Emergency Response Notification System

ERNS supports the release notification requirements of section 103 of the Comprehensive Environmental Response Compensation, and Liability Act (CERCLA), as amended; section 311 of the Clean Water Act; and sections 300.51 and 300.65 of the National Oil and Hazardous Substances Contingency Plan.

Additionally, ERNS serves as a mechanism to document and verify incident-location information as initially reported, and is utilized as a direct source of easily accessible data, needed for analyzing oil and hazardous substances spills.

**TXVCP**  
**Texas Voluntary Cleanup Program**

Created under HB 2296, The Texas Voluntary Cleanup Program (VCP) was established on 9/01/1995 to provide administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas. Since future lenders and landowners receive

protection from liability to the State of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or under used properties may be restored to economically productive or community beneficial uses. After cleanup, the parties receive a certificate of completion from the TCEQ which states that all lenders and future land owners who are not PRP's are released from all liability to the State.

*Parts of the above description were taken from the TCEQ/VCP Website. (<http://www.TCEQ.state.tx.us/permitting/remed/vcp/>)*

*The investigation phases are listed as INVESTIGATION, REMEDIATION, POST-CLOSURE, and COMPLETE.*

## **TXIOP**

### Innocent Owner/Operator Program

The TX IOP, created by House Bill 2776 of the 75th Leg, provides a cert. to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not loc. on the prop., and they did not cause or contribute to the source or sources of contamination. Like the TxVCP Prog., the IOP can be used as a redevelopment tool or as a tool to add value to a contaminated prop. by providing an Innocent Owner/Operator Certificate (IOC). However, unlike the VCP release of liability, IOCs are not trans. to future owners/oper's. Future owners/oper's are eligible to enter the IOP and may rec. an IOC only after they become an owner or operator of the site.

*The above description were taken from the TCEQ/IOP Website.

# TelALL Zip Index

The following zip codes, are the zip codes that TelALL used for generating the preceding report. The information is provided to help our customers make the most thorough data evaluation possible. Lat/Lon. info is provided to assist in locating sites. Lat/Lon info that is listed as "0" indicates that the site has not been geocoded. This does not indicate that the site is an orphan or was not evaluated by TelALL's research personnel.

SALE OF SURPLUS PROPERTY  
ON NAVIGATION BOULEVARD  
BEING THE RESIDUE OF LOTS  
1, 2, 3, 4 and 8, BLOCK  
126, CENTRAL PARK ADDITION

COUNCIL MOTION No. 70-1734

DRAWING No. 8606

PARCEL No. S 71-51

Field notes covering a parcel or tract of land containing 12,278 square feet, being the residue of Lots 1, 2, 3, 4 and 8, Block 126, Central Park Addition, as per map or plat of said addition recorded in Volume 5, Pages 23 and 24 of the Map Records of Harris County, Texas, in the S. M. Williams Survey, Abstract No. 87, in Houston, Harris County, Texas and being more particularly described by metes and bounds as follows:

Beginning at a point the intersection of the north line of Navigation Boulevard with the Westerly line of Block 126, Central Park Addition;

Thence N 31° 46' E along the westerly line of said Block 126, a distance of 248.81 feet to a 3/4 inch iron rod marking the most northerly corner of said Block 126;

Thence South along the east line of said Block 126, and the West line of Terminal Street, a distance of 92.65 feet to a 3/4 inch iron rod;

Thence S 20° 49' W along the West line of Terminal Street, a distance of 142.68 feet to a point;

Thence S 65° 49' W, a distance of 21.21 feet to a point in the north line of Navigation Boulevard;

Thence N 69° 11' W along the north line of Navigation Boulevard, a distance of 65.19 feet to the place of beginning.

## **SUBJECT: ENVIRONMENTAL SITE ASSESSMENTS PHASE I**

### **1. PURPOSE**

This procedure provides guidelines for conducting Phase I Environmental Site Assessments for land involved in City of Houston real estate transactions, inter-departmental transfers, or construction projects, as well as rights-of-way which will be involved in City of Houston construction projects.

### **2. APPLICATION**

This procedure is to be used by all divisions involved in engineering/design, real estate, construction management, and also City consultants and subconsultants.

### **3. OBJECTIVE**

The objective of this procedure when used for real estate transactions is to discover any existing potential adverse environmental conditions consisting of the presence of hazardous substances or petroleum products on the property in question and adjacent properties, prior to the transaction.

For construction projects, the objective is to document environmental conditions of construction zones and areas immediately adjacent to the construction zone that could impact the design, construction or performance of a proposed construction project, prior to the design of the project and the solicitation of the bids.

### **4. BACKGROUND**

Since 1994, the City has maintained the policy of requiring that a Phase I Environmental Site Assessment (ESA) be conducted on property to be acquired and on construction projects involving excavation or installation of underground utilities located in City rights-of-way. Some of the ESAs were performed in-house by City personnel and others were performed by private consulting firms working under contract to the City or as a subcontractor. Previous standards and guidelines for ESAs developed by the City have relied upon generally accepted, industry standard practices or upon the Standard Practice developed by the American Society for Testing and Materials (ASTM), first published in 1993 and subsequently revised in 1994 and 1997.

As time has progressed, it has become evident that in certain situations additional information beyond the minimum required in the ASTM Standard is appropriate. Other situations suggest that the ASTM Standard requirements are excessive for certain types of projects. In order to provide guidance to those persons and firms

conducting Phase I ESAs for the City, this Standard Practice categorizes the various types of projects that require a Phase I ESA and sets a minimum scope of work for the ESA.

## 5. PROCEDURES

Below are the minimum scopes of work for Phase I ESA for (A) property to be acquired by the City; (B) property involved in divestitures and inter-departmental transfers; and (C) City construction projects. If a project will involve the acquisition of an additional easement for a right-of-way and construction in that right-of-way (e.g., the acquisition of curb cuts for a street widening project), the project shall be treated as a construction project and subject to Section C below.

A. A Phase I ESA on property to be acquired by the City should conform to the ASTM Standard Practice E 1 627-97 with the following additions:

- 1) The sources of historical data reviewed for a site shall include, at a minimum, historic aerial photographs, fire insurance maps (where available), local city street directories (where available), and recorded land title records (Chain of Title). Applicable copies of these sources shall be presented in the report. One aerial photograph for approximately every five years from approximately 1950 to the present shall be obtained of an appropriate scale (if available) to clearly indicate site detail. Sites inside the IH-610 Loop shall have property usage identified from the present, back a minimum of 100 years, or to the property's obvious first development, whichever is earlier.
- 2) If regulatory records indicate that Leaking Petroleum Storage Tank (LPST) or state superfund facilities are located within 500 feet of the site, the latest comprehensive assessment or monitoring report maintained on the facility by the Texas Natural Resource Conservation Commission (TNRCC) shall be reviewed and summarized in the ESA report. All records reviewed shall be conducted during the Phase I ESA. (Files may be ordered for express delivery from the TNRCC Central Records at 512-239-2927.)
- 3) If regulatory records indicate that a federal superfund facility is located within approximately 1/4 mile of the site<sup>1</sup> the files maintained on that facility by the public library shall be reviewed and summarized in the ESA report. (Files are available in the Government Documents Section of the Central Houston Public Library<sup>1</sup> 500 McKinney, Houston.)
- 4) The TNRCC's Voluntary Cleanup Program database shall be searched

for facilities that are located within approximately 1/4 mile of the site. (The database is regularly updated and is accessible on the Internet at <http://www.tnrcc.state.tx.us/waste/pcd/vcp/index.html#database>)

- 5) If buildings or structures are located on the site which were built before 1960, the ESA shall include a statement from a qualified asbestos/lead professional giving a list of observed suspect asbestos-containing materials and lead-based painted surfaces. If materials generally known to be asbestos or lead containing (i.e.: 9" x 9" floor tiles, transite panels, or floor paint striping) are observed, specific mention should be made with quantities estimated.
- 6) If the site includes undeveloped property which will be developed, available wetlands maps shall be obtained and reviewed, the presence of hydric soil types shall be reviewed using published information, and the presence of standing or flowing water shall be investigated during the site inspection. The environmental professional shall make a statement in the report concerning the potential for the presence of wetlands on the site and whether a full wetlands determination or delineation is recommended.
- 7) In addition to the interviews required in the ASTM Standard Practice, interviews shall also be conducted with owners or occupants of off-site facilities within 500 feet of the site as follows:
  - a) All commercial businesses that typically use hazardous chemicals or petroleum substances, such as dry cleaners, photo developers, mortuaries, and automotive service centers.
  - b) Selected or representative commercial establishments that do not typically use hazardous chemicals or petroleum substances,
  - c) All facilities identified in the regulatory records review, and
  - d) All industrial facilities.
- 8) If the site is in an area of known oil and gas production operations a record search for oil and gas exploration and production wells on or adjacent to the site shall be included in the ESA.
- 9) The environmental professional who conducted the ESA shall make recommendations for Phase II testing, as appropriate which shall be thorough enough to support a Phase II ESA.

- B Phase I Environmental Site Assessments On property involved in divestitures or Inter-departmental transfers may conform to the ASTM Standard Practice for Transaction Screen Process, E 1528-96, if the property has a low profile and low potential for adverse environmental impact, such as excess vacant property located in a residential area. Property involved in divestitures or inter-departmental transfers that are high profile and/or have a higher potential for adverse environmental impacts, such as developed property in a commercial or industrial area, should utilize ASTM Standard Practice E 1527 97 with the additions listed above In Section A,1) through 9).
- C Phase I Environmental Site Assessments on rights-of-way which will be involved in City construction projects shall conform to the ASTM Standard Practice E 1527-97 with the following reductions (Item 1) and additions (Items 2 through 8):
- 1) The approximate minimum search distance for Standard Environmental Record Sources, except for Federal National Priorities List (NPL), Federal RCRA TSD Facilities, and Texas Hazardous Waste Sites (HWS) may be reduced, pursuant to ASTM E 1527-97 7.1.2.1, to a radius of 500 feet unless there is a justifiable reason to maintain a larger radius. The minimum search distance for Federal NPL, Federal RCRA TSD and Texas HWS facilities shall be maintained at the ASTM specified distance of 1.0 mile. *(The reduction is reasonable In light of the geological characteristics found In Houston, and the focus of the ESA being discovery of potential shallow contaminants in corridor construction zones.)*
  - 2) The sources of historical data reviewed for a project shall include, at a minimum, historic aerial photographs, fire insurance maps (where available), and local city street directories (where available). Applicable copies of these sources shall be presented in the report. (Review of land title records or a Chain of Title is not required since no property is being acquired).
  - 3) If the regulatory records indicate that Leaking Petroleum Storage Tank (I-PST) or state superfund facilities are located within 500 feet of the site, the latest comprehensive assessment or monitoring report maintained on the facility by the Texas Natural Resource Conservation Commission (TNRCC) shall be reviewed and summarized in the ESA report. All records reviewed shall be conducted during the Phase I ESA. (Files may be ordered for express delivery from the TNRCC Central Records at 512-239-2927.)

- 4) If regulatory records indicate that a federal superfund facility is located within approximately ¼ mile of the site, the files maintained on that facility by the public library shall be reviewed and summarized in the ESA report. (Files are available in the Government Documents Section of the Central Houston Public Library, 500 McKinney, Houston.)
- 5) The TNRCC's Voluntary Cleanup Program database shall be searched for facilities located within approximately 500 feet of the right-of-way, (The database is regularly updated and is accessible on the Internet at <http://www.tnrcc.state.tx.us/waste/pcd/vcp/index.html#database>)
- 6) Interviews shall be conducted with owners or occupants of facilities directly adjacent to the right-of-way as follows:
  - a) All commercial businesses that typically use hazardous chemicals of petroleum substances, such as dry cleaners, photo developers mortuaries, and automotive service centers,
  - b) Selected or representative commercial establishments that do not typically use hazardous chemicals or petroleum substances,
  - c) All facilities identified in the regulatory records review, and
  - d) All Industrial facilities.
- 7) If the site is in an area of known oil and gas production operations, an oil and gas survey shall be included in the ESA.
- 8) The environmental professional who conducted the ESA shall make recommendations for Phase II testing, as appropriate, which shall be thorough enough to support a Phase II ESA.

## 6. ADMINISTRATIVE CONTROLS

- A. Maintenance Responsibility - Responsibility for updating this procedure is assigned to the Environmental Engineering Section of the Facilities Division.
- B. Filing Procedures - This procedure is to be filed numerically with other Standard Practices in the Project Manager's Manual and in the ECRE Procedures Manual.

## Houston Fire Department Search Request

Following are all incidents at the requested location to which the Hazardous Materials Response Team responded from January 1, 1994 through today's date; they are not necessarily the only spills that may have occurred during the period of time. This report has been furnished by the Hazardous Materials Response Team. Contact person is Senior Captain Troy D. Lilley, phone number (713) 928-6711; FAX number (713) 928-6160.

**NOTE: HMRT does not maintain records for locations outside of the City of Houston.**

Requesting Company: TLC ENGINEERING

Company Representative: LIDA GAMBLE
